

CAS Charger ASC 55 | 12 – 36 V | EU 18 V – 2.0 Ah

Artikelnummer: S000500072

Product image may differ from the actual item

- + Battery voltage: 12 – 36 V
- + Mains voltage: 220 – 240 V
- + Max. charging current: 3 / 4 A
- + Charging time for 18 V / 4.0 Ah: 80 min

The CAS Charger ASC 55 (12–36 V, EU version) is a high-speed charger designed for all Li-Ion and LiHD battery packs from 12 to 36 V within the CAS system. Its patented AIR COOLED charging technology actively cools the batteries during the charging process, significantly reducing charging times. A processor-controlled charging management system ensures gentle charging, extending battery life and maximizing the number of charge cycles. Thanks to its very low stand-by power consumption, the charger operates with outstanding energy efficiency. With full CAS compatibility, it is suitable for all CAS battery packs and the batteries of all CAS partners.

AIR COOLED charging technology: actively cools battery and reduces charging time

Very low standby power consumption for energy-efficient operation

One charger for all – compatible with battery packs from all CAS partners

Processor-controlled charging management for gentle charging

One battery that fits all

Compatible BECK cordless tools

- + BECK Cordless Framing Nailer 33°, 90 mm | FSN33-90 BC
- + BECK Cordless Brad Nailer 55 mm | BN18-55 BC
- + BECK Cordless Narrow Crown Stapler 40 mm | NC90-40 BC

This product is compatible with all 18V battery packs and chargers of the CAS brands.
