LIGNOLOC® WOODEN NAILS WITH HEAD

LIGNOLOC® WITH HEAD

The wooden nail with head was developed for façade construction. It has a blunt anti-splitting point and is suitable for the most common soft-wood façades as well as a variety of other applications, both indoors and outdoors, such as privacy elements, garden sheds, garden pavilions, room dividers, etc.

LIGNOLOC® WOODEN NAILS

- No wood glue necessary
- Much faster than wood plugs
- Made of German beech wood
- Fungus-resistant
- No corrosion and streaking on wood
- Ecologically sustainable

DESCRIPTION

LIGNOLOC® is the first ever pneumatically driven wooden nail for future-oriented use in industrial production and ecological timber construction (among many other applications).

The revolutionary LIGNOLOC® wooden nails are made from indigenous beech wood. Their mechanical properties allow the nails to be driven into solid structural timber* and wooden materials with the FASCO® LIGNOLOC® pneumatic nailer, without predrilling, to form an inseparable bond with the timber.

* for wood weighing 350 to 500 kg/m³ and in compliance with edge distances specified in Eurocode 5
