DESCRIPTION

LIGNOLOC® is the world's first shootable wood nail with a stepped shank. The metal-free nails enable pure wood-to-wood joints: components can be sawn, planed, and sanded without concern for metal parts, and can be recycled at the end of their use without metal separation. With a diameter of 3.5 mm and a length of 25 or 37 mm, the LIGNOLOC® wood nail offers the ideal solution for precise and fine work. Particularly suitable for kitchen and furniture construction as well as demanding interior projects, this nail impresses with its stepped shaft, which minimizes the risk of wood splitting. Perfect for carpenters and joiners.

**for wood with a density of 350 to 500 kg/m³ and in compliance with edge distances per Eurocode 5*
