

BECK

BECK *INMOTION*

OUR HAND-GUIDED SLED FOR PRECISE STAPLING & NAILING

Your entry into series production

WORK UPRIGHT. FASTEN PRECISELY.

SAVE TIME.

Working bent over, driving each fastener one at a time, and measuring spacing by hand – that's how serial stapling and nailing has worked until now. BECK INMOTION automates this step: the hand-guided sled triggers automatically at precisely defined intervals. This significantly speeds up the workflow, cuts time and cost while still delivering exact results and a more ergonomic, upright working posture.

Anyone fastening flooring, sheathing, or façades in series knows the bottlenecks: the body fatigues and spacing becomes inconsistent. On top of that, investing in expensive bridge-type portal systems only pays off at high volumes.

BECK INMOTION fills exactly that gap –
the ergonomic, affordable entry into professional series production, built around a base unit that can be reconfigured in seconds.

Protect your back and joints

Work upright instead of bent over. The adjustable handles and extension Handle let you guide the tool while standing.

Set precise fastening points

Choose your defined fastening spacing and drive LIGNOLOC® Wooden Nails, SCRAIL® Nail Screw Fasteners, and staples at exact intervals.

Switch tools in seconds

BECK INMOTION gives you access to a wide range of compatible fastening tools: switch flexibly between nailers and staplers in seconds.

Efficient fastening in series production

ONE BASE UNIT – *MULTIPLE TOOLS.*

BECK INMOTION is the flexible solution for entering professional series production. The hand-guided sled triggers mounted pneumatic tools at precisely defined intervals, enabling fast, exact, and ergonomic stapling and nailing.

Easy changeover

Compatible staplers and nailers attach securely to the base unit and can be swapped out quickly whenever needed.

Flexible spacing settings

Four defined fastening spacing settings: 40, 60, 80, and 120 mm

Precise guidance

Rigid axles and profiled wheels ensure especially precise guidance.

Ergonomic operation

Two trigger handles, one of which is infinitely adjustable, provide a high level of operating comfort.

Suited to many applications

OUR RANGE *FOR INMOTION.*

#01

STAPLERS

F47C B7/G-65 IM
F47C SQ-65 IM
F81 BSP-130 IM
F47 NKG/Q-65 IM

#02

COIL NAILERS

F44AC CN15-PS60A LIGNOLOC® IM
F44AC CN15W-PS65 IM

#03

COIL SCRAIL®er

F60 CN15W-PS90 SCR IM
F44AC CN15W-PS65 SCR IM

Ready in seconds

QUICK *TOOL CHANGE.*

01

Load the magazine

Load the SCRAIL® Nail Screw Fasteners, staples, or nails that match your fastening tool.

02

Attach the tool

Set the depth-adjustment screw to the required drive depth and secure the tool in place.

03

Connect the air hoses

Connect the hoses according to the color coding.

04

Connect compressed air

Couple the compressor‘s air hose.

05

Perform a test shot

Press the single-shot trigger, check the result, readjust the depth if necessary, and secure it.

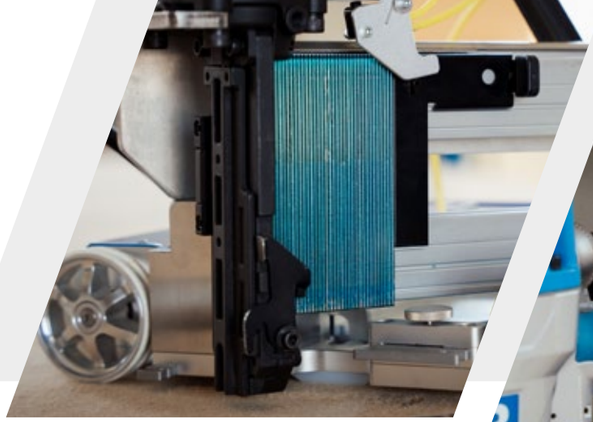

How it works

FLEXIBLE STAPLING AND NAILING – *WITH BECK INMOTION.*

The mechanical control system of BECK INMOTION triggers pneumatic tools at different intervals depending on the setting. Smooth and precise in straight-line motion – for ergonomic, consistent work in series production.

Modular design. **For maximum flexibility.**

Watch now:
Wall module construction with BECK INMOTION

Stay flexible

TIMBER MODULE CONSTRUCTION, FLOORING, *AND INTERIOR FINISHING.*

Anywhere fastening needs to be consistent and done in series.

Timber Frame & Prefab Construction

Fastening of wood-based panels, gypsum fiber board, gypsum board, and insulation boards.

Drywall & Interior Finishing

Drywall construction – from the subfloor to wall paneling.

Flooring & Sheathing

Consistent fastening patterns over large areas, with ergonomic operation while standing.

Exterior Cladding & Façades

Precisely defined spacing – even in visible areas for a flawless finish.

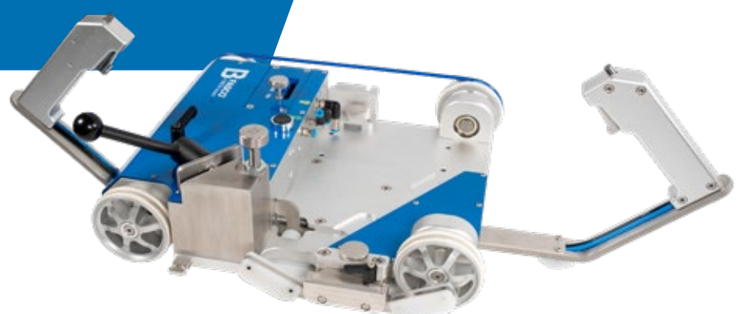

Precise and flexible

BECK INMOTION *HAND-GUIDED SLED.*

BECK INMOTION is the flexible, efficient solution for entering professional series production. Its modular design allows numerous tools to be integrated.

Height	Width	Length	Weight	Trigger System	Operating Pressure
200 mm	318 mm	670 mm	9,58 kg	Remote Actuation	maximal 8,3 bar

Pneumatic connection
Hose connection via quick coupling

Guide the unit safely

BECK INMOTION *POGO STICK.*

The extension handle provides optimum freedom of movement when working across large surfaces. Standard length: 100 cm – the ideal accessory for ergonomic work while standing.

Flexible
For working while standing or two-person operation.

Ergonomic
Its design makes the Pogo Stick suitable for operators of any height.

360° joint
Precise, controlled guidance in every direction.

Your entry into series production

ALL FEATURES *AT A GLANCE.*

#01 **Fixed aiming device**
Front and rear

#02 **All settings and adjustments**
Can be made quickly and easily

#03 **Handles on both sides, individually triggered**
One side continuously adjustable

#04 **Mechanically predefined fastening intervals**
40, 60, 80 und 120 mm

#05 **Robust construction**
Made from durable materials

#06 **Quick tool change**
A wide range of compatible fastening tools for maximum flexibility

#07 **Three triggers, maximum flexibility**
Continuous triggering while rolling by operating the safety and trigger on the handle or Pogo Stick, plus single-shot triggering via the base carriage.

#08 **Centrally positioned safety contact**
For fastening close to edges

#09 **Precise straight-line tracking**
Dual-profile wheels

#10 **Adjustable side guide up to 100 mm**
With integrated parking position

COMPATIBLE TOOLS *FOR INMOTION.*

Eight BECK nailers and staplers can be mounted on INMOTION within seconds.

Tool	Type	Length
F44AC CN15W-PS65 IM	Nailer	25 – 65 mm
F44AC CN15W-PS65 SCR IM	Nailer / SCRAIL®er	Nails: 25 – 65 mm SCRAIL®: 30 – 57 mm
F44AC CN15-PS60A LIGNOLOC® FS IM	Wood nailer	38 – 60 mm
F60 CN15W-PS90 SCR FS IM	Nailer / SCRAIL®er	Nails: 45 – 90 mm SCRAIL®: 50 – 90 mm
F47C B7/G-65 IM	Stapler	25 – 65 mm
F47C SQ-65 IM	Stapler	25 – 65 mm
F47 NKG/Q-65 IM	Stapler	25 – 65 mm
F81 BSP-130 IM	Stapler	65 – 130 mm

Since 1904.

WHY *BECK?*

Since 1904, the family-owned company BECK has stood for innovation in fastening technology. What began with a pioneering spirit has evolved into an internationally active specialist in high-performance fastening systems.

Our Wooden Nails

With our LIGNOLOC® Wood Nailing Systems, we enable metal-free wood-to-wood connections, opening up new possibilities for circular construction.

Over 30,000 products

With a specialized stock range and a portfolio of more than 30,000 items, we offer the right solution for almost every application.

Our range extends from

+ collated pins and clipped-head nails, to
+ staples and nails, to
+ innovative systems such as SCRAIL® Nail Screw Fasteners.

Innovative solutions

This expertise, combined with our commitment to continuously advancing innovation with a strong focus on practical applications, is also reflected in solutions such as the BECK INMOTION hand-guided sled: it simplifies workflows and enables an efficient, modular entry into serial production.
