X10PRO

EXTENSION HANDLE

PROFESSIONAL BENEFITS

+ Ergonomic operation of power-actuated tools while maintaining an upright working posture
+ Trigger integrated into the handle
+ Adjustable height: 580 – 700 mm
+ Additional handle for improved stability and easier transport

DESCRIPTION

The extension handle transforms hand-held FASCO® tools into ergonomic stand-up fastening tools, allowing users to work in an upright position. This improves ergonomics while supporting faster, more efficient, and more precise operation. Combined with the corresponding tool kit, the extension handle forms a modular system. A single extension handle can be used with various FASCO® tools from BECK, providing maximum versatility while minimizing the number of required components. The extension handle features adjustable height settings, allowing it to be adapted to different working conditions and the operator‘s height for optimum comfort and performance.
